YIFA 中国·伊发

YFL 系列漏电火灾报警系统 – 监控软件
## Series leakage current fire alarm system-monitoring software

概 述 General

YFL 监控系统软件采用 windows2000 操作系统，开机自启动，无需额外操作即可以进入系统主界面。主界面能够显示探测器分布图，通过不同的颜色显示其工作状态，并且对于每一个探测器的工作参数适时显示。

YFL monitoring system software adopts operating system of windows2000, automatic start up when the system is switched on, and enter into main interface of system without additional operation. The main interface displays the scatter diagram of detectors, displays their working states by means of different colors, and displays working parameters of each detector at suitable time.

概 述 General

YFL 监控系统软件采用 windows2000 操作系统，开机自启动，无需额外操作即可以进入系统主界面。主界面能够显示探测器分布图，通过不同的颜色显示其工作状态，并且对于每一个探测器的工作参数适时显示，处理并记录告警信息。

YFL monitoring system software adopts operating system of windows2000, automatic start up when the system is switched on, and enter into main interface of system without additional operation. The main interface displays the scatter diagram of detectors, displays their working states by means of different colors, and displays working parameters of each detector at suitable time, also deals with and records the warning information.

概 述 General

YFL 监控系统软件采用分级操作，高级别用户可以通过 YFL 监控系统软件进行系统复位，对探测器发送脱扣指令，并且还可以以对连接在总线上的探测器修改并下发运行参数。

YFL monitoring system software adopts graded operation, high-grade users could carry out system reset through YFL monitoring system software, and send out tripping command to the detector, also could modify and send down running parameters to detectors that are connected with the bus wire.
